Polish Care Guide

Congratulations on your decision to invest in a solid timber bench top from The Woodsmiths. This bench top has been lovingly handcrafted especially for you, to our high-quality standard. We do ask you to read and implement the care and cleaning instructions, so your investment is protected, and your warranty is kept valid.

Installation

It is very important that installation is carried out according to instructions provided. If this is not the case, the warranty will not stand.

Care & Cleaning Instructions

- This bench top is totally sealed with a hardwearing two-pack polyurethane. Clean top with any non-abrasive household cleaner & microfibre cloth, and leave to dry.
- Although not generally required, to polish bench top, apply any non-silicone furniture polish and buff off with soft cloth. It is important that no abrasive material or cleaners are used at all.
- Do not subject bench top to any concentrated heat; e.g. hot pots, pans, mugs and direct sunlight. Place mats, tiles, glass or marble should be used in areas where hot pots and pans are used frequently.
- Solid timber is a natural product; a small amount of movement is normal and acceptable.

Just like you, the team at The Woodsmiths loves a good pat on the back! If you're happy to share some love in the form of a testimonial, we'd be thrilled to hear from you! Give us a shout—let's spread the joy!
